

APPtitude

Sriram Rajaraman (Team Leader) - srajaram@gmu.edu

Souraj Chadha - schadha@gmu.edu

Nijjati Muhetaer - nmuhetae@gmu.edu

John Tayamen - jtayamen@gmu.edu

Meet Time:

We decided to meet on Thursday mornings around 10 am. If required, we will meet after 5 pm on Thursdays.

Addition Feature:

A high score table to keep track of the best 10 scores. Users will be able to see if they are on the top 10 of any individual quiz after they finish the quiz. . If the users beats any of the top 10 scores, they will added to the list and the lowest score will be dropped. If the user ties with any of the top 10, then the user will be added below the tied score and the lowest score will be dropped. If 10 people haven't taken a particular quiz, then user's score gets appended to top 10 list. Also, duplicate names and scores are allowed.

Team Leader:

The team leader was chosen naturally. Sriram took the initiative to find a meeting location and time. He is also very familiar with git and GitHub and its practical uses for group projects. This method is preferred because Sriram wanted the role. It is less effective than when a leader is picked unwillingly. Also, he has experience with use cases and UML diagrams from other cs classes.
